

LM DK200

LM D300

The latest Heavy weight

SIEGENIA AUBI[®]
SOLUTIONS INSIDE

Support heavy weights with ease

Large scale glazed facade systems and efficient ventilation concepts are part of the latest trend in contemporary architecture. In the world of hardware technology this is synonymous with exceptional demands on a product's load bearing capacity with traditional standard hardware being pushed to its limits.

IEGEMIA-AUBI's innovative product range satisfies all the demands of a modern facade with specially developed solutions for building projects.

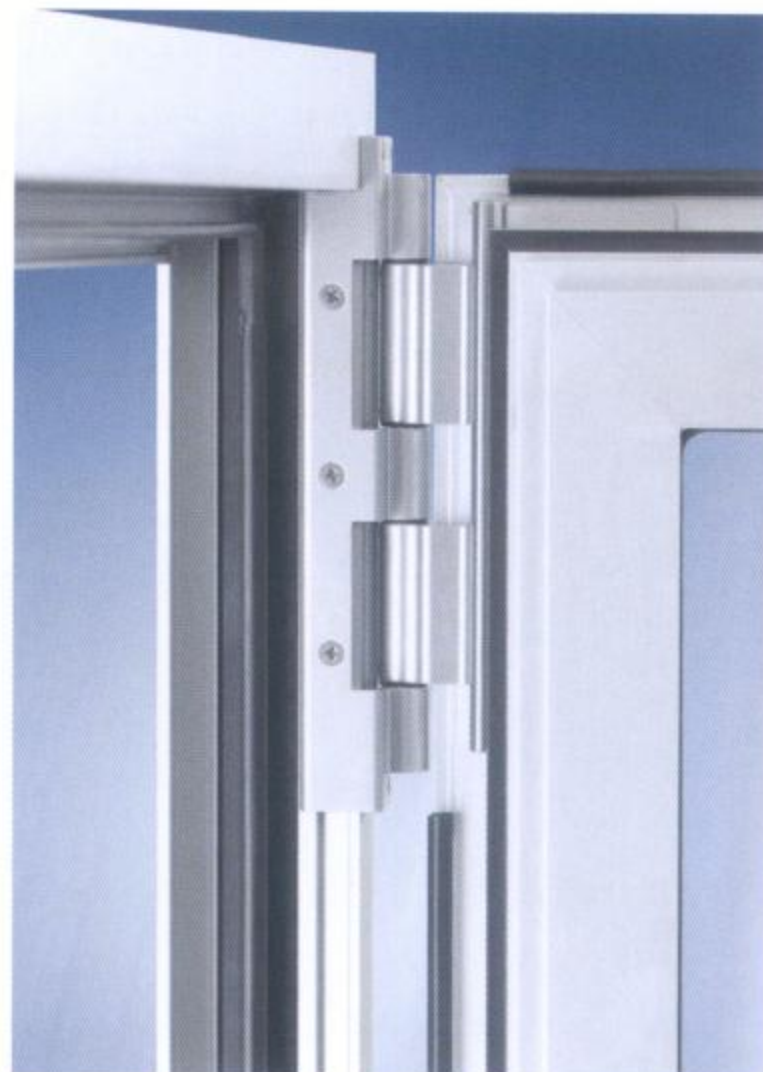

- LM DK200 for turn first windows up to 200 kg sash weight
- LM D300 for turn only windows up to 300 kg sash weight (manual or motorised option)

- ▶ High exposure to light due to large scale glazing
- ▶ Generous ventilation section for effective air exchange
- ▶ Can be integrated into monitoring and building management systems

New measures for building projects

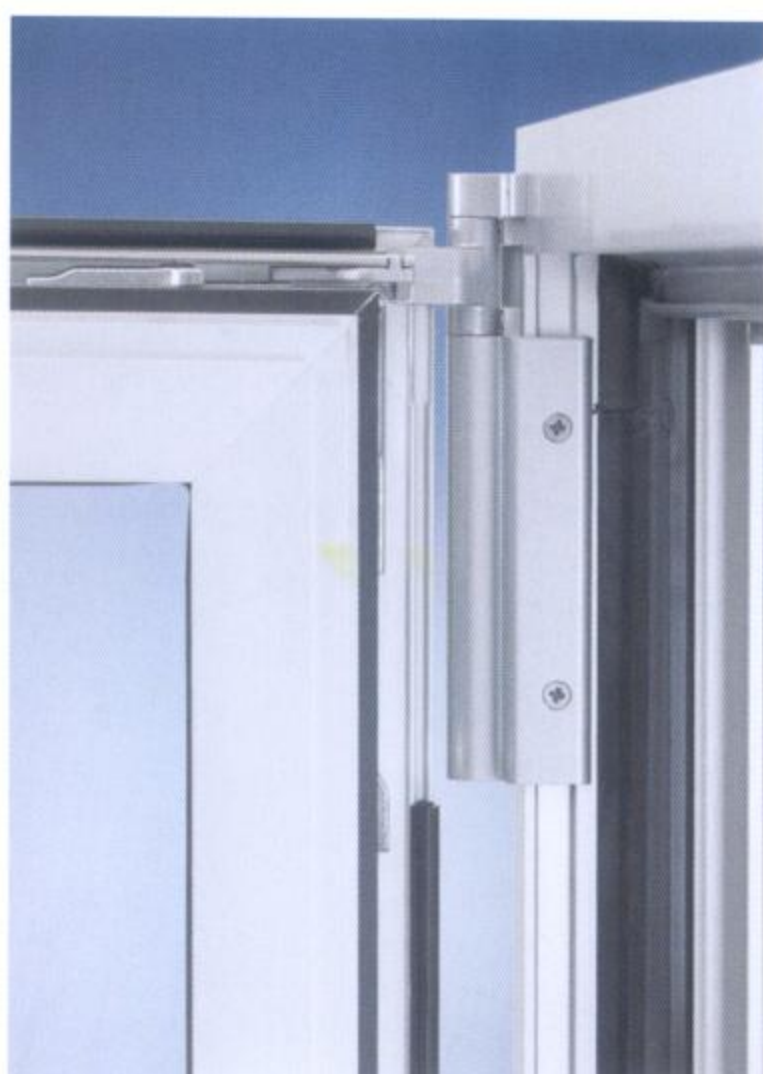

LM D300

- Different types of turn sash openings
- 300 kg maximum load bearing
- Infinitely variable height adjustment
- High level of stability and impermeability with an additional central hinge (depending on specification)

LM DK200

- Available in turn first and tilt before turn (TBT)
- 200 kg maximum load bearing
- Infinitely variable height and side adjustment

▶ Ideal for large-scale glazing with heat and sound insulation and anti-theft protection

▶ Highly flexible adjustment options

▶ Wide range of accessories
