

With operator safety in mind, casement restrictor stays offer a non-releasable restrictor for casement windows.

Features

- Allows ventilation with a degree of security – particularly in multi-story applications
- Smooth operation using a plastic carriage manufactured from nylon
- Can be used in conjunction with a friction hinge, butt hinge or continuous hinge
- Can also be used as a friction adjuster or a restrictor device
- Restrictor is invisible when the window is closed as it is installed in the cavity
- All stainless steel construction
- Composite bearings

Specifications

- 270 mm (10") in length
- Suitable for metal and wood surfaces
- Opening of window determined through restrictor placement
