

# Secure sliding door comfort for life!

***PSK 200-Z and PSK 160***

***Carefully designed hardware technology for parallel slide and tilt  
doors in timber, PVC or aluminium***

# Trust the window expert – and you'll be well advised!

## ***It all comes down to technology***

Light, air and lots of freedom of movement – that's how large parallel slide and tilt doors provide a high quality of living and quality of life for the whole family. This is especially true with intelligent hardware technology from SIEGENIA-AUBI providing safe and easy operation for many years.

When you decide on a SIEGENIA-AUBI partner you've already taken the most important step: detailed advice and a competent specialist who puts their faith in the right technology – so there's now nothing standing in the way to make your dreams come true.

***Trouble-free fitting.***

The fitting of your new sliding door is carried out more easily and quickly than you would think. Simply have the process explained by your window specialist and you'll soon see.

# PSK 200-Z

## Operation becomes child's play!

### ***Tilt and slide heavy weights more easily.***

With large heavy, sliding doors, everything depends on first class ease of operation. The technology behind our new SIEGENIA-AUBI hardware has therefore been optimised with a view to large parallel slide and tilt doors. Even sash weights of up to 200 kg can easily be operated with one hand.

A simple 90° movement of the beautifully shaped handle will bring the sash automatically and freely into the tilt position. A further downward twisting movement and the sash is brought back and it is now child's play to slide it to the side.

- Sash weights up to 200 kg
- Sash widths up to 2000 mm
- Sash heights up to 2360 mm
- Automatic control of the sash in the tilted position

# PSK 200-Z

# PSK 160

## Tilt and slide easily and safely.

### **Stock Rationalisation**

Standard tilt and turn window components can be used for the PSK 160 giving you superb performance along with stock rationalisation.

- Sash weights up to 160 kg
- Sash widths up to 1600 mm
- Sash heights up to 2360 mm
- Manual control of the sash in the tilted position

# PSK 160

# Security for what matters to you most

## ***Feels right from the start***

Even in the standard version, SIEGENIA-AUBI hardware offers a high level of security.

With parallel slide and tilt fittings, even with the general basic security level, it's been made more difficult for an opportunist burglar to lever out the sash.

If desired this basic security level can easily be increased in stages. Ask your window specialist about this.

The technical bit:

SIEGENIA-AUBI parallel slide and tilt fittings offer locking mushroom cams at all four corners which can be combined with striker plates made of special hardened sheet steel.

# Be quite sure and completely secure

## ***It all comes down to technology***

Opening and closing 15,000 times and more – that just shows you what goes into your sliding door. Brand name hardware from SIEGENIA-AUBI doesn't only make your windows more secure – it also provides easy, trouble-free operation, for the whole of the window's lifetime. So, look out for the technology in the window. Your window expert will be happy to advise you.
